

## **National Power’s Storm Team Activates to Support Critical Power and Infrastructure as Hurricane Idalia Approaches**

Raleigh, N.C., August 28, 2023 – National Power, a power infrastructure company headquartered in Raleigh, NC announced today that it has activated its Storm Team to support power and infrastructure restoration as Hurricane Idalia approaches. National Power will initially deploy resources to the State of Florida, and will follow the storm’s path, which is anticipated to include Georgia, South Carolina, and North Carolina.

National Power’s Storm Team includes a full complement of resources, including generator technicians, fuel, parts, and mobile generators. The mobilization of this team will support mission critical customers, including hospitals and healthcare facilities, emergency services, internet providers, wireless communication towers, wastewater facilities, and other critical industries. As the team continues to track and follow the latest development of Idalia, National Power is ready to support the restoration of vital communications and power to residents and businesses in impacted areas to repair and mitigate the impact of power outages swiftly and safely.

Chris Hutter, National Power’s Chief Executive Officer, stated, “We are proud to support customers in Florida and along the East Coast in response to Hurricane Idalia. We preemptively activated the National Power Storm Team to maximize the positive impact we can make and shorten restoration times. Supporting mission-critical power and infrastructure is our business -- our focus is on assisting customers by swiftly restoring operations following this significant storm event. The specialized expertise and experience of our teams is focused on minimizing downtime for our customers, and their customers, who rely on mission-critical power and infrastructure.”

### **About National Power**

At National Power, everything we do is focused on delivering reliability and resilience to mission critical customers. Our power and infrastructure solutions lead the industry, with a deep and broad set of capabilities that include standby power, AC and DC power systems, batteries and energy storage, renewables, HVAC, UPS systems, power quality, and disaster recovery. Our team is built to serve the needs of sophisticated customers whose operations simply cannot be interrupted. This includes customers in the broadband, telecom, healthcare, manufacturing, municipal, water/wastewater, military, retail/distribution and other critical industries. We have delivered thousands of successful projects over decades. We also provide on-going preventative maintenance and emergency service – bolstering the reliability of our solutions. We serve customers coast-to-coast, with teams built locally. We can be found online at [www.natpow.com](http://www.natpow.com).
